IT Support Engineer → **System Support Engineer** → **Application Packaging & SCCM Support Engineer** → **SCCM / Intune Administrator** → **Endpoint Management Engineer**

PROFESSIONAL EXPERIENCE

Company / Payroll	Client / Location	Duration	Role / Career Stage
Kforce Inc.	Kforce India / Pune	Jan 2026 – Present	Endpoint Management Engineer
Outworks Solutions Pvt. Ltd.	Client: Bajaj Auto	Aug 2025 – Nov 2025	SCCM / Endpoint Administrator
Shro Systems Pvt. Ltd.	Client: Bajaj Auto	Apr 2025 – Jul 2025	IT Operations Analyst – SCCM / Endpoint Support
Emergys Labs Pvt. Ltd.	Client: Accenture – Axis Bank Project	Feb 2022 – Apr 2025	Application Packaging & SCCM Support Engineer
Noble Hospital, Hadapsar	Healthcare IT Operations	Feb 2021 – Dec 2021	System Support Engineer
CMS IT Services	Client: DMart	Jul 2018 – Mar 2020	IT Support Engineer

ROLE-WISE RESPONSIBILITIES

Kforce Inc. – Endpoint Management Engineer | Jan 2026 – Present

- Administer Microsoft Intune and SCCM/MECM in a hybrid endpoint environment supporting Windows, iOS, Android, and macOS devices across enterprise users.
- Manage device enrollment, compliance policies, configuration profiles, Conditional Access, MDM/MAM settings, Company Portal support, and Windows Autopilot provisioning.
- Support Windows Autopilot enrollment, device readiness, provisioning failures, app deployment issues, and secure onboarding activities for new and existing users.
- Resolve L1/L2 endpoint incidents and service requests within SLA, including Intune, SCCM, Microsoft 365, compliance, application deployment, and device access issues.
- Actively support P1/P2 incidents related to endpoint services and coordinate with internal teams to reduce business impact and restore services quickly.
- Troubleshoot SCEP certificate issues, application installation failures, Windows upgrade failures, SCCM client health, compliance errors, and device communication issues using Intune, SCCM, and client-side logs.
- Participate in Windows feature upgrade planning, deployment validation, reporting, change documentation, and post-change checks.

Outworks Solutions Pvt. Ltd. / Shro Systems Pvt. Ltd. – SCCM / Endpoint Support | Client: Bajaj Auto | Apr 2025 – Nov 2025

- Supported SCCM/MECM administration for the Bajaj Auto endpoint environment, covering application deployment, patching, software distribution, task sequences, and endpoint compliance.
- Created and maintained device/user collections for application and patch deployment based on client requirements and deployment scope.
- Monitored deployment status, analyzed SCCM logs, validated installation success, and supported remediation for failed deployments and patch issues.
- Performed SCCM client health checks and troubleshooting for client communication, WMI, BITS, deployment failure, and patch installation issues.
- Supported monthly compliance reporting, deployment validation, change documentation, and post-deployment checks for business and technical stakeholders.
- Worked closely with technical, business, and support teams to close high-priority issues and maintain stable endpoint operations for the client environment.

Energys Labs Pvt. Ltd. – Application Packaging & SCCM Support Engineer | Client: Accenture – Axis Bank Project | Feb 2022 – Apr 2025

- Worked as Application Packaging & SCCM Support Engineer for the Accenture – Axis Bank project, supporting client-side enterprise application deployment and endpoint support requirements.
- Created, tested, and deployed application packages through SCCM/MECM, including deployment type configuration, detection methods, installation commands, uninstall commands, and user/device-based targeting.
- Performed application packaging and deployment validation for business applications, utilities, patches, and client-required software before production rollout.

- Created and maintained SCCM collections for application deployment, pilot testing, phased rollout, and production deployment based on client requirements.
- Monitored deployment status, verified installation success, tracked failed deployments, and coordinated remediation actions with support and infrastructure teams.
- Troubleshoot application installation failures, package errors, content distribution issues, client-side failures, and deployment-related incidents by analyzing SCCM and Windows logs.
- Assisted with SCCM administration activities including client health checks, deployment compliance review, patch/application deployment support, and basic software distribution troubleshooting.
- Handled L1/L2 application and infrastructure incidents using ITSM processes, ensuring SLA-based resolution for application access, Microsoft 365, endpoint errors, and user-impacting issues.
- Prepared deployment notes, SOPs, package validation steps, troubleshooting references, and operational documentation to support repeatable application deployment processes.

Noble Hospital, Hadapsar – System Support Engineer | Feb 2021 – Dec 2021

- Provided day-to-day system and IT support for hospital users, including desktop support, Microsoft 365, Outlook, Teams, printer, network, and application-related issues.
- Supported user account activities, login issues, email configuration, basic system administration, endpoint readiness, and device setup for internal users.
- Performed antivirus checks, endpoint health validation, hardware/software troubleshooting, and coordination with internal teams for issue closure.
- Maintained basic IT asset details and supported laptop/desktop configuration, replacement, and operational support activities.

CMS IT Services – IT Support Engineer | Client: DMart | Jul 2018 – Mar 2020

- Started career in IT support by handling end-user incidents, desktop support, hardware/software troubleshooting, printer support, basic network issues, and store IT operations.
- Managed tickets through Unidesk, updated resolutions, escalated unresolved issues, and supported SLA-based service delivery for DMart users.
- Administered Symantec Endpoint Protection activities including antivirus definition checks, client health, policy updates, quarantine support, and unmanaged system follow-up.
- Supported laptop/desktop configuration, POS hardware readiness, asset inventory, device tagging, warranty coordination, and remote troubleshooting.
- Assisted with Active Directory password resets, Microsoft 365 setup, Outlook configuration, Teams support, and user access-related issues.

CORE & TECHNICAL SKILLS

Endpoint Management: Microsoft Intune, SCCM/MECM, Co-management, Windows Autopilot, Device Enrollment, Company Portal, Compliance Policies, Configuration Profiles, Conditional Access

SCCM & Deployment: Application Packaging, Application Deployment, Software Update Point, Distribution Points, Boundary Groups, Collections, Task Sequences, OSD, Driver Injection, Patch Management, Software Distribution, Client Health

Support & Administration: ServiceNow, Unidesk, Datto RMM, Entuity, Datto EDR, Symantec SEPM, Active Directory, Azure AD, Microsoft 365 Admin Center, Exchange, Outlook, Teams, PowerShell, Reporting, SLA Management

EDUCATION & CERTIFICATIONS

Bachelor of Engineering – Electronics and Telecommunication | Pune University, Maharashtra | 2017

Certifications: ITIL Foundation Certified; Kaseya Certified Technician in Datto RMM; Microsoft 365 Infrastructure Administration

PROFESSIONAL STRENGTHS

- Strong troubleshooting mindset with hands-on experience in endpoint, deployment, patching, compliance, and user-impacting issues.
- Good understanding of ITIL process, SLA-based support, incident handling, escalation coordination, and change validation.
- Able to work across support, infrastructure, security, and business teams to close issues with clear communication and ownership.
- Focused on documentation, deployment validation, reporting, SOP preparation, and maintaining audit-ready operational records.
- Continuous improvement approach with interest in automation, endpoint stability, compliance improvement, and modern workplace operations.
