| CMS IT Services              | Client: DMart                 | Jul 2018 – Mar 2020 | IT Support Engineer                             |

## ROLE-WISE RESPONSIBILITIES

**Kforce Inc. – Endpoint Management Engineer | Jan 2026 – Present**

- Administer Microsoft Intune and SCCM/MECM in a hybrid endpoint environment supporting Windows, iOS, Android, and macOS devices across enterprise users.
- Manage Windows Autopilot device registration and provisioning, enrollment status, configuration profiles, compliance policies, Company Portal, Conditional Access, and Microsoft Entra ID integration.
- Support Windows 11 deployment and feature upgrade activities through Autopilot and Intune, including deployment readiness, pilot validation, app assignment, upgrade monitoring, reporting, and post-deployment checks.
- Configure and support endpoint security settings including BitLocker, security baselines, antivirus, device restrictions, app protection policies, and app configuration policies.
- Troubleshoot Autopilot failures, application deployment, patching, policy conflicts, compliance errors, SCEP certificate issues, Windows upgrade failures, SCCM client health, and device communication issues using Intune, SCCM, and client-side logs.
- Use Intune reporting and Endpoint Analytics to review device health, deployment status, compliance, and user experience, and periodically assess policies and new Intune features for service improvement.
- Resolve L1/L2 endpoint incidents and service requests within SLA and coordinate P1/P2 incidents with internal teams to minimize business impact.
- Use PowerShell for endpoint information gathering, Autopilot hardware hash activities, basic administration, and troubleshooting support.

**Outworks Solutions Pvt. Ltd. – SCCM / Endpoint Administrator | Client: Bajaj Auto | Aug 2025 – Nov 2025**

- Supported SCCM/MECM and Microsoft Intune operations for the Bajaj Auto endpoint environment, covering application deployment, patching, software distribution, device configuration, and endpoint compliance.
- Created and maintained device and user collections for application and patch deployments based on client requirements, pilot groups, and production rollout scope.
- Monitored update and application deployment status, analyzed SCCM and Intune logs, validated installation success, and performed remediation for failed deployments, patch issues, and non-compliant devices.
- Assisted with Intune configuration profiles, compliance policies, Windows Update for Business update rings, application assignments, BitLocker status checks, and Conditional Access-related device readiness.
- Performed SCCM client health troubleshooting for client communication, WMI, BITS, content download, software update, and application installation issues.
- Prepared monthly compliance and deployment reports and worked with technical, business, and support teams to close high-priority endpoint issues.

**Shro Systems Pvt. Ltd. – IT Operations Analyst, SCCM / Endpoint Support** | Client: Bajaj Auto | Apr 2025 – Jul 2025

- Supported SCCM/MECM and Intune-based endpoint operations, including application deployment, patching, software distribution, Windows device management, and compliance monitoring.
- Assisted with Windows and mobile device enrollment, configuration profile assignments, compliance validation, Company Portal support, and troubleshooting of policy synchronization issues.
- Supported application installation and upgrade deployments for Windows endpoints, monitored deployment results, and investigated installation failures using SCCM, Intune, and Windows logs.
- Performed patch deployment monitoring, device compliance checks, BitLocker status validation, client health review, and remediation follow-up for failed or inactive endpoints.
- Provided L1/L2 support for endpoint, Microsoft 365, device access, policy, application, and Windows upgrade issues while maintaining clear ticket updates and SLA-based closure.
- Contributed to operational documentation, deployment validation, reporting, and coordination with infrastructure and business teams.

**Emergys Labs Pvt. Ltd. – Application Packaging & SCCM Support Engineer** | Client: Accenture – Axis Bank Project | Feb 2022 – Apr 2025

- Created, tested, and deployed enterprise application packages through SCCM/MECM, including detection methods, installation and uninstall commands, dependencies, requirements, and user/device targeting.
- Performed application packaging, upgrade, pilot validation, phased rollout, and production deployment for business applications, utilities, patches, and client-required software.
- Created and maintained SCCM collections and monitored deployment status, installation success, failures, content distribution, and remediation actions.
- Troubleshoot application installation failures, package errors, content issues, client-side failures, and deployment incidents using SCCM and Windows logs.
- Assisted with SCCM client health, deployment compliance reviews, patch and application support, and handled L1/L2 application and infrastructure incidents through ITSM processes.
- Prepared deployment notes, SOPs, package validation steps, troubleshooting references, and operational documentation.

**Noble Hospital, Hadapsar – System Support Engineer** | Feb 2021 – Dec 2021

- Provided desktop, Microsoft 365, Outlook, Teams, printer, network, application, user account, login, and endpoint readiness support.
- Performed antivirus checks, hardware and software troubleshooting, device setup, asset updates, and coordination for issue closure.

**CMS IT Services – IT Support Engineer** | Client: DMart | Jul 2018 – Mar 2020

- Handled end-user incidents, hardware and software troubleshooting, printer support, basic network issues, POS readiness, and store IT operations.
- Managed tickets through Unidesk, supported Symantec Endpoint Protection, asset inventory, device tagging, warranty coordination, Active Directory password resets, Microsoft 365, Outlook, and Teams.

## **CORE & TECHNICAL SKILLS**

**Endpoint Management:** Microsoft Intune, SCCM/MECM, Co-management, Windows Autopilot, Windows 11 Deployment, Device Enrollment, Company Portal, Windows and Mobile Device Management

**Intune Configuration & Compliance:** Configuration Profiles, Compliance Policies, Device Restrictions, App Protection Policies, App Configuration Policies, Conditional Access, Microsoft Entra ID

**Patching & Security:** Patch Compliance, BitLocker, Security Baselines, Antivirus, Endpoint Security

**Application Management:** Packaging, Detection Methods, Upgrades, Troubleshooting

**SCCM & Deployment:** Collections, Task Sequences, OSD, Software Update Point, Distribution Points, Boundary Groups, Driver Injection, Software Distribution, Client Health

**Reporting & Troubleshooting:** Intune Reporting, Endpoint Analytics, Deployment and Compliance Reporting, Intune and SCCM Logs, Windows Logs, SLA Management

**Administration & Tools:** Microsoft 365 Admin Center, Exchange, Outlook, Teams, Active Directory, ServiceNow, Unidesk, Datto RMM, Entuity, Datto EDR, Symantec SEPM, PowerShell

## **EDUCATION**

**Bachelor of Engineering – Electronics and Telecommunication** | Pune University, Maharashtra | 2017

## **PROFESSIONAL STRENGTHS**

- Strong troubleshooting mindset with hands-on experience in endpoint management, Autopilot, deployment, patching, compliance, security configuration, and user-impacting issues.
- Good understanding of ITIL processes, SLA-based support, incident handling, escalation coordination, change validation, and stakeholder communication.
- Focused on documentation, reporting, deployment validation, SOP preparation, audit-ready records, continuous improvement, and evaluation of new endpoint capabilities.
